II. Write reports with guidance questions (65%)

1. What is your professional goal in five years? 15%

➢ My career goals in five years: I have three big goals
   • Study and job
      ▪ Have a job in the company
      ▪ Study after completing PNC
      ▪ Study a job in the company
   • Business
      ▪ Online shop
      ▪ Computer Training Center
   • Family
      ▪ Make a house for mom and dad
      ▪ Make a stall for mom
      ▪ Help brother

2. What are your strengths and weaknesses? 10%

➢ My strengths and weaknesses
   • Strengths
      ▪ Highly committed
      ▪ Build relationships
      ▪ Front-end (HTML, CSS, JS, Database)
      ▪ There is a high effort
      ▪ Reveal the truth to those around you
      ▪ not easy to believe anything
      ▪ I can work like 80% of men
      ▪ Hide secrets
   • Weaknesses
      ▪ Quick to panic
      ▪ Soon pity
      ▪ Lie to others
      ▪ Remembering
      ▪ Help others
      ▪ Language learning

3. What kind of company do you want to work for? And why? 10%
➢ I want to work for the company is a bank. Because banks have a lot of projects we can do and the money increases according to the ability, and good pay, it offers a fast-paced, continuously challenging career.

4. How do you plan to upgrade yourself after PNC? 10%

➢ My plan to upgrade after PNC
    • have a job in a company
    • Try for my job
    • have a plan for the future
    • try new things
    • Learn a new IT language
    • Build relationships

5. What do you think about how the future of the IT job market evolves in Cambodia? 10%
➢ The future of the IT job market is evolving in Cambodia. I think well if you want to be strong in the future, you need to know a lot about technology. In addition, to solve a human problem or meet a human need or desire. Technology can help provide human food, shelter, communication, entertainment, and much more.
6. How do you adapt yourself to the evolving IT job market? 10%
➢ I adapt to the growing IT job market, I know a lot about technology and can learn about technology because the IT job market is very active and competitive. Many companies want to create technology to make people aware of IT.

III. Attach one JD of your ideal job (5%)
- o Job Description
  - ▪ Roles and responsibilities
    - Develop proposed UX-UI assigned by immediate/direct supervisor.
    - Assist the supervisor in preparation of user storyboard and/or customer journey screens.
    - Work with business, products, and/or related teams to gather requirements to design aesthetic elements for use in web and mobile applications.
    - Conduct research and survey through various platforms to collect customer feedback on application attractiveness, convenience, user-friendliness, and experience; recommend change/improvement and make presentation to related teams and senior management.

- Report to immediate/direct supervisor and perform other duties assigned by management from time to time.
  - o Job Requirements
    - Qualification
      - Bachelor or higher degree in IT, UI-UX designs, and/or related fields;
      - At least 1-year experience in UX-UI designs.
      - Good knowledge base and competency to use some of visual design programs, e.g., Figma, Adobe XD, Adobe Photoshop, Illustrator, JIRA, and other applications/programs (abilities to use Figma, Adobe XD, and JIRA are of great advantages).
      - Ability to work effectively in a collaborative environment to create interfaces for product/service owner across the Bank.
